# ALL ABOUT YOU!

## 8TH ANNUAL PERSPECTIVE USERS' CONFERENCE MARCH 1- 2, 2016

### Dispatch 5.0 – Administration

#### **Dispatch Users**

Unlike previous versions, a Person record and user account must first be created in Perspective Administration before you can create an account in Dispatch. Dispatch account types include Dispatch/Officer, Administrator, or Reviewer. Users with Reviewer privileges have read-only access to the application.

#### Locations

Locations now allow you to upload images, such as a photograph, floor plan, or blueprint of a location to provide visual references for your dispatchers and officers in the field. This information can then be analyzed further once a dispatch is closed and moved to Perspective as an activity.

		Settings	$\ominus$ $\Theta$ $\otimes$

	IAD11 Manassas	Points (1)	

#### **Indoor Location Points**

Indoor location points can be created to identify exact locations and provide visual cues for your dispatchers and officers with images such as photos, maps, and floor plans. Indoor location points are created within a larger location and can be associated with your Perspective sites.

#### **Additional Features**

Dispatch numbers can be reset at a specific time and frequency and you can configure how long closed dispatch records are kept in the Closed Dispatches panel. You can also create visual alerts on the default or High Contract theme, create dispatch templates, organize your security personnel into zones and teams, adjust the names and order of dispatch priorities, and much more.

set Dispatch Number: set at:	6:18 AM	1
